Freelancer

December 2014 - Present7 yrs 4 mos

My Company

Clube Premiado

https://clubepremiado.app.br/

I create one website for Instagram/Tiktok raffles and develop a webscraping to get Instagram/Tiktok photos and videos comments using PHP, Laravel and JQuery. It was my most difficult project, because Instagram and Tiktok has many of security systems to protect about webscraping. I sold this complete project to a company.

Tech skills: PHP, CSS, CSS3, PHP/MySQL, Javascript ES6, Laravel, Bootstrap, HTML5

The project still in use, but I can't talk about, because I solded it.

Secret Projects

I develop any systems for companies, but I can't talk about it, they are all secret and has contract about it. The only thing I can say is about my experience with PHP, Laravel, Lumen (for Laravel), Bootstrap, Javascript, JQuery, HTML5, CakePHP and a little experience with host servers. I have been working with that technologies since 2014, but I focus in freelas in 2018, when I started live this.

Tech skills: PHP, CakePHP, CodeIgniter, CSS, CSS3, PHP/MySQL, Security, Javascript ES6, Laravel, Lumen (for Laravel), Bootstrap, HTML5

Some projects still used, but some ended. The most of projects I develop was for Startups, so it's hard to talk about.

NextUP Delivery

NextUP Delivery

I create a project to help companies who works with delivery when the pandemic started. My company provided an app, website and platform for any company who needed, helping they with the technology, knowledge and marketing. To reach it, I pay one developer to develop an app in React Native and I own develop the website, the API and the panel in Laravel/Lumen. The duration of the development was three months working alone, it was one of my big projects and I have the code to show to anyone if necessary.

Tech skills: PHP, CSS, CSS3, PHP/MySQL, Javascript ES6, CakePHP, Laravel, Lumen (for Laravel), Bootstrap, HTML5, AWS, EC2

I sold the company to focus in another things. My dream is work in a company out of my country and be free to travel the world while I work. We stop the company in 2021, but I solded the company last month and I can show it online soon.

LAM Digital

SorteSim

It was a site for brazilian lottery games developed in PHP, Laravel and CakePHP. I lead the team with six developers, we develop a website and an app for this project.

Tech skills: PHP, CSS, CSS3, PHP/MySQL, Javascript ES6, CakePHP, Bootstrap, HTML5

The project ended in 2020 because the government created a website for the same thing.

Esse é Craque

It was a project to help kids grows in soccer carrer, like a social network, but our partnership in this project was Cafu(Brazilian professional player). In this project I worked in everything. I structure the project, I design it and I help my team to develop any part of the system. The project was amazing, we reach 30.000 downloads in the launch because we appear in a TV program. We developed an API for the APP and Site connect in Lumen and develop the website in Laravel.

Tech skills: PHP, CSS, CSS3, PHP/MySQL, Javascript ES6, Laravel, Lumen (for Laravel), Bootstrap, HTML5

The project ended in 2019 but I can't talk about the motive, because I leave the company before it happens.
